

FAASTeam presents:

What you need to know for Practical IFR Flying

A review of key areas such as DPs, ODPs, diverse departures, approach plates including RNAV differences, and communicating in the IFR system.

The objective of this session is to refresh those areas that you may have forgotten or are not aware of. Knowledge is a key foundation to being a safe and competent IFR pilot.

If you are instrument rated but find it hard to stay current, working on your instrument rating, thinking of getting the rating, or a VFR pilot who wants to learn more about segments of the national airspace system, this event can benefit you. Come and join us so that we can learn from one another and make General aviation flying safer. Pilots are encouraged to bring Southwest terminal charts (paper or electronic) but it is not a requirement.

Directions: From Hwy 99, Merle Haggard Drive East to Airport Drive. South on Airport Drive to Skyway Drive.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
